PERSONALIZED EXCEPTIONAL CANCER CARE

WHITE PLAINS HOSPITAL IS A MEMBER OF THE MONTEFIORE HEALTH SYSTEM

Cancer Program Executive Council

LEADERSHIP MESSAGE

The White Plains Hospital Cancer Program brings together compassionate, personalized cancer care with precision diagnostics, a wide choice of treatment options and access to clinical trials and cutting edge research – all brought to our patients from expert, experienced specialists.

This brochure outlines the services we offer, including: medical oncology, surgical oncology, chemotherapy, biotherapy, immunotherapy, radiation oncology, genetic counseling, diagnostics, and a full array of integrative services.

The White Plains Hospital cancer team is here for you from screening and diagnosis to treatment and survivorship. We work as partners with you, your family, your care team, and your community to deliver exceptional cancer care.

Our patients also have access to all the comprehensive services available at White Plains Hospital, including 24/7 emergency care at our Flanzer Center for Emergencies and Critical Care.

Thank you for choosing the White Plains Hospital Cancer Program.

*White Plains Hospital Cancer Program...
Exceptional, every day.*

ABOUT US

The Cancer Program at White Plains Hospital is dedicated to providing exceptional cancer care that is comprehensive, coordinated and compassionate. This high standard for cancer care in the region reinforces our commitment to clinical excellence and an unwavering focus on the unique needs of each individual patient.

White Plains Hospital is a member of the Montefiore Health System, and is among a highly selective group of hospitals nationwide to be designated with Magnet® nursing status in 2012, and again in 2016. The quality of the program is further demonstrated by its accreditation by the Commission on Cancer and the National Accreditation Program for Breast Centers (NAPBC). It is also recognized by the American College of Radiology as a Breast Imaging Center of Excellence.

OUR MISSION

The mission of the White Plains Hospital Cancer Program is to provide patient-focused cancer care in a highly specialized, caring environment.

OUR GOALS INCLUDE:

- Meeting our patients' physical and psychosocial needs by combining state-of-the-art diagnostic treatment technologies, surgical techniques, and professional expertise with a compassionate and personal approach to patient care
- Providing interdisciplinary, evidence-based care for each individual patient
- Offering access to a wide spectrum of clinical trials
- Providing a supportive, healing environment, with care for the patient's mind, body and spirit
- Offering access to 24/7 emergency care and seamless referrals to physicians with expertise in various specialties across all departments of White Plains Hospital

ABOUT US

RESEARCH AND CLINICAL TRIALS

The White Plains Hospital Center for Cancer Care is home to a variety of clinical trials offering patients promising new therapies for cancer prevention and treatment. Using the latest in diagnostic approaches, cutting-edge technology, and novel drugs, White Plains Hospital provides patients access to advanced research and clinical trials, close to home.

All clinical trials at White Plains Hospital are held to high standards of safety and oversight. The White Plains Hospital staff includes physicians credentialed by the National Cancer Institute (NCI) to direct clinical trials. A 14-member Institutional Review Board (IRB) meets monthly to discuss clinical trials. If you are interested in participating in a clinical trial or finding out more information, you can ask your doctor if you may be eligible for a clinical trial or explore available trials at wphospital.org/clinical-trials.

White Plains Hospital also works in close partnership with the Montefiore Einstein Center for Cancer Care to offer clinical trials to White Plains Hospital patients. The Albert Einstein Cancer Center is a National Cancer Institute designated Cancer Center.

OUR PHYSICIANS AND STAFF

One of the many factors in distinguishing good cancer care from exceptional care is the people delivering it. The staff at White Plains Hospital have trained at the finest institutions around the world and across the country, and have chosen to bring that care into our community. Every member of the cancer care team at White Plains Hospital is here for patients, ready to listen to personal concerns as they go through cancer diagnosis and treatment.

ADVANCED CARE

The White Plains Hospital Cancer Program offers highly specialized and advanced cancer care—close to home. Services offered include the following:

Genetic and Genomic Profiling: This type of DNA sequencing of cancers allows for improved targeting of the malignant disease – a personalized approach to cancer therapy.

Navigational 3-dimensional bronchoscopy:

Navigational bronchoscopy is a tool used for early diagnosis of lung cancer. It uses a flexible tube and GPS monitor to look inside the lungs and airway.

SPY intraoperative perfusion assessment system:

This system is used to help reduce complications and improve outcomes in women undergoing post mastectomy breast reconstruction.

Robotic surgery: Minimally invasive surgery is used for the management of head and neck cancer, thoracic tumors, prostate cancer, and gynecologic tumors. The advantages of this type of surgery include smaller incisions, less blood loss, and quicker recovery time.

Immunotherapy: White Plains Hospital is able to offer cutting-edge immunotherapy for management of numerous forms of cancer. Immunotherapy is a promising new area in the treatment of cancer, and uses a patient's own immune system to destroy cancer cells.

Stereotactic Radiosurgery: Stereotactic radiosurgery (SRS) has revolutionized the management of many different cancers. With previous techniques, radiation that was delivered to the cancerous growth also affected a significant volume of surrounding, normal tissue. Advances in stereotactic localization, noninvasive neuroimaging, and radiation physics allow us to irradiate a precisely defined target over several days, rather than weeks, while almost completely sparing the surrounding, normal tissue.

Radioembolization: Radioembolization is a cutting-edge safe and effective way to manage patients with unresectable liver cancer. Using intra-arterial injection of yttrium-90, (Y-90)-labeled microspheres, radioembolization induces extensive tumor necrosis with minimal side effects

ABOUT US

OUR PARTNERSHIP WITH MONTEFIORE

White Plains Hospital is a member of the Montefiore Health System – which provides even greater access to advanced treatment options and a seamless system of care for our patients. White Plains Hospital is a gateway to highly-specialized treatment at Montefiore, with all the advantages of Montefiore’s innovative care delivery system and academic partnership with the Albert Einstein College of Medicine. Examples of cross-campus programs for highly specialized cancer care include the orthopedic oncology program as well as the stem cell transplantation program.

Patients seen at White Plains Hospital have more options than ever before to enroll in cancer clinical trials, including access to clinical trials offered at Montefiore Medical Center.

“I was about to fulfill a dream and join the Yankees Fantasy Camp. Then melanoma threw me a curveball. Thankfully, an all-star team came together to save my life.”

– Louanne Mitchell

The White Plains Hospital and Montefiore Health System partnership ensured that Louanne Mitchell received exceptional, all-star care, close to home. Her medical team consisted of doctors from the White Plains Hospital Cancer Program and Montefiore Einstein Center for Cancer Care.

OVERVIEW OF SERVICES

COORDINATION OF CARE

At White Plains Hospital, specialized staff deliver individualized, compassionate cancer care.

Whether you're undergoing surgery, receiving chemotherapy, immunotherapy or radiation therapy, or a combination of the above, you can expect expert coordination of care from your healthcare team.

Our interdisciplinary team meets multiple times each week at a tumor board. It is here that most patients are discussed and an evidence-based plan of care is decided upon through the collaborative efforts of the many experts in the room.

In addition, the Hospital offers comprehensive counseling to support every aspect of physical and emotional well-being.

Interdisciplinary Tumor Board Meeting

DIAGNOSTICS

Pathology

White Plains Hospital has a full service laboratory on site, offering specialized testing and analysis including Anatomic Pathology, Histology, Cytology, Blood Bank, Chemistry, Hematology and Microbiology. Our pathologists are integrated into disease management groups in the Cancer Center and provide expert diagnoses in a timely fashion after tissue sampling. Biomarker assessment and genomic testing are the cornerstone of precision cancer medicine and pathologists provide expertise regarding state-of-the-art tests and diagnostic algorithms. In addition, laboratory tests are utilized to monitor a patient's general health during treatment, check for potential side effects, and determine whether a cancer is responding to treatment.

Pathology and Laboratory services operate 24 hours a day, seven days a week. White Plains Hospital's Laboratory is accredited by the College of American Pathologists (CAP), NYS Department of Health, The Joint Commission and American Association of Blood Banks.

Those who require emergency care can receive it 24/7 at the advanced Flanzer Center for Emergencies and Critical Care at White Plains Hospital.

OVERVIEW OF SERVICES

Radiology

Radiologists use a variety of techniques and equipment to produce images of the human body and diagnose disease. The White Plains Hospital's Radiology Department utilizes state-of-the-art equipment with board-certified Radiologists to perform complex tests.

WHITE PLAINS HOSPITAL RADIOLOGY SERVICES:

- Interventional Oncology
- CT (Computed Tomography) scans, including the use of advanced 64-slice CT scan
- MRIs (Magnetic Resonance Imaging)
- PET (Positron Emission Tomography) scans
- Nuclear Medicine testing such as bone scans
- SPECT (Single Photon Emission Computed Tomography), thyroid scans, and lung scans
- Nuclear Cardiology procedures
- Women's Imaging services such as 3D digital mammography, breast ultrasound, pelvic ultrasound, breast MRI, and breast and thyroid biopsies
- Offered at several convenient locations across White Plains, New Rochelle, Rye Brook, and Armonk

TREATMENTS

Surgical Oncology

Our surgeons utilize the latest minimally invasive and laparoscopic surgical techniques with smaller incisions, which can help reduce discomfort from surgery as well as enable faster recovery times.

Since 2005, White Plains Hospital has been a regional leader in robotic surgery for oncology patients using the da Vinci® Surgical System.

Medical Oncology

Medical Oncologists are doctors who specialize in the diagnosis and treatment of cancer. They oversee and coordinate care, providing a comprehensive array of diagnostic, consultative, and therapeutic services. Medical oncologists have specialized training in the use of therapies such as chemotherapy, hormonal therapy, biological therapy, immunotherapy, and targeted therapy.

Infusion Services

White Plains Hospital provides infusion services to patients with cancer and other chronic conditions that require intravenous treatments, injections, and blood transfusions. The staff includes a dedicated team of oncology nurses with specialized training and certification in chemotherapy administration, as well as dedicated Nurse Practitioners. Infusion patients have immediate access to a medical oncologist.

Amenities at the renovated infusion center include: valet parking, Wi-Fi, and refreshments.

Each infusion chair is fully adjustable to suit patients' preferences and includes lighting, temperature, and sound controls.

OVERVIEW OF SERVICES

Department of Radiation Oncology at the White Plains Hospital Center for Cancer Care

Located within the White Plains Hospital Center for Cancer Care, the Department of Radiation Oncology utilizes the latest state-of-the-art technology to provide faster, safer and more effective cancer treatment for our patients. Our physicians use these tools to deliver precise doses of radiation with pinpoint accuracy to treat tumors.

With the full complement of radiotherapy treatment options available, the Center for Cancer Care offers treatment for all cancers including breast; urologic cancers; thoracic (including lung and esophageal malignancies); head and neck cancers; gastrointestinal tumors including colorectal, anal, hepatobiliary; gynecologic cancers; hematologic tumors including lymphomas, myeloma; skin cancers as well as neurologic or central nervous system tumors. An individualized treatment plan is provided offering the most sophisticated radiotherapy approaches, combined where appropriate, with chemotherapy, immunotherapy, hormonal therapy, and surgery in an interdisciplinary team approach. Patients can also participate in national, international and/or Industry-sponsored clinical trials.

The Department is fully accredited by the American College of Radiology-Radiation Oncology Program and by the National Accreditation Program for Breast Centers.

Center for Radiosurgery Offers Surgical Precision, Without the Incision The new Center for Radiosurgery at White Plains Hospital Center for Cancer Care is a interdisciplinary collaboration between radiation oncologists and subspecialty experts in neurosurgery, thoracic surgery, hepatobiliary surgery, urology, head and neck surgery and interventional radiology. The Center for Radiosurgery offers patients access to the most sophisticated radiosurgical treatment options for tumors of the brain, spine, lungs, liver, pancreas, prostate and head and neck utilizing the Varian EDGE® Full-Body Radiosurgery system. For patients, this means access to the most effective non-invasive treatment available for many cancer types, which provides sub-millimeter precision and minimal impact on surrounding tissues and organs. Treatments are more convenient, often requiring only one to five outpatient visits. Our Center for Radiosurgery is the first of its kind throughout Westchester, Putnam, Rockland, Orange, and Fairfield counties

Advanced Technology In addition to the Varian Edge system, the Department of Radiation Oncology is equipped with some of the most advanced treatment technology in the region, including the Varian Truebeam® Full-Body Radiosurgery system, Varisource High Dose Rate Remote Afterloading Brachytherapy System and the GE Discovery 4D CT Simulator.

■ **GE Discovery RT CT** simulator provides an 80 cm wide-bore for maximum patient comfort, metal artifact reduction and Max Field of View for optimal image quality; and a deviceless 4D CT for motion management and tracking of mobile tumor targets.

■ **The Edge and TrueBeam** are state-of-the-art linear accelerators that allow our radiation oncologists to offer patients the full array of advanced radiotherapy treatment options, including:

- Stereotactic body radiotherapy (SBRT), also known as Stereotactic ablative radiotherapy (SABR)
- Stereotactic radiosurgery (SRS)
- Volumetric modulated arc therapy (VMAT)
- Intensity modulated radiotherapy (IMRT)
- Image Guided Radiotherapy (IGRT)
- 3D conformal radiotherapy (3D-CRT)
- Breath-hold and breathing-phase gated radiotherapy delivery using Varian’s Optical Surface Monitoring (OSMS), Calypso, and Real-Time Position Management (RPM) systems
- Electron beam therapy

■ **Brachytherapy** is a procedure where small amounts of radiation (the size of a pencil tip) are temporarily placed in or near the cancerous tissue using computerized axial tomography.

- High dose rate (HDR) brachytherapy is an extremely effective technique for easily accessible areas with tumors or at risk for recurrence.
- An average treatment lasts 5-10 minutes. This approach is frequently used for breast and gynecologic cancers, but can be used in any areas where tumors are easily accessible.

OVERVIEW OF SERVICES

SUPPORTIVE SERVICES

A cancer diagnosis can be overwhelming. In addition to the medical and surgical services, White Plains Hospital offers a full array of supportive services, as well as educational workshops and events, to our patients. We may also offer referrals to additional resources from trusted community partners.

Genetic Counseling

Cancer genetics professionals are trained to assess a person's risk for developing cancer, based on a person's genetic makeup and family history. Following an in-person consultation, specific genetic tests may be ordered based on your personal and/or family history of cancer.

Our genetic counselors tailor each consultation to fit your specific needs and provide valuable information on early detection and prevention. To learn more, call 914-849-7658.

Clinical Navigation

Navigating a cancer diagnosis can be complex and sometime overwhelming. Currently, White Plains Hospital offers clinical navigation services to assist breast and lung cancer patients in the coordination of their care, with plans to expand the Clinical Navigation program to other diagnoses.

Clinical Navigators help facilitate consultations, appointments, testing, and treatments. Navigators can serve as a point of contact for patients, their families and the interdisciplinary team with the goal of integrating care and improving its effectiveness and efficiency. To contact our clinical navigators, call 914-849-7500.

Social Work

Social work services are available to provide support to patients, families, and caregivers through their journey of treatment and care.

The oncology social worker focuses on the psychological, social, and emotional issues that people face during and after cancer treatment.

Our social workers can also offer assistance with decision making, goals of care, advance directives, and communication needs. Counseling services are available to patients and family members to help alleviate anxiety and stress and to explore techniques that will lead to stronger and more effective coping. They can also provide other services, including education, referrals to outside resources, and support groups.

Nutrition

Nutrition is an important part of the cancer experience. Our dedicated oncology nutritionists are available to complete a nutritional assessment and address nutritional concerns.

Workshops and educational programs on relevant topics are ongoing throughout the year and open to the public.

Women's Health and Cancer

White Plains Hospital has special services for women undergoing cancer treatment, providing individualized guidance on hormonal, dietary and lifestyle factors, as well as information on treatment side effects, screening, early detection and community outreach initiatives.

Holistic Care/Integrative Health

At White Plains Hospital, we recognize that people are more than the sum of their parts, and that attention to all aspects of their being – mind, body, and spirit – is essential to health and wellness. The Integrative Health program at White Plains Hospital provides evidence-based holistic modalities which complement conventional medical care. Delivered by licensed health care professionals with advanced education and training in complementary and integrative health/ Holistic Nursing, our innovative model of care improves quality of life, manages symptoms, and helps individuals cope with illness and actively participate in their health and healing.

Speech Pathology

The speech-language pathologist (SLP) provides services including comprehensive evaluation and treatment of both inpatients and outpatients with swallowing disorders as well as voice, speech, language, and cognitive-linguistic disorders in individuals with cancer diagnoses. Patients will be supported prior to, during and after their cancer care for any changes in speech-language or swallowing function.

A VARIETY OF OFFERED HOLISTIC MODALITIES INCLUDE*:

- Acupuncture
- Art Therapy
- Guided Imagery/Visualization
- Healing Touch
- Massage
- Meditation
- “M” Technique (gentle touch therapy)
- Music Therapy
- Pet Therapy
- Reiki
- Relaxation Techniques
- Yoga

* Subject to change and availability of practitioners.

OVERVIEW OF SERVICES

Physical Therapy

Physical therapy services for oncology patients, focused on Lymphedema care, are coordinated through the Burke Rehabilitation Hospital Outpatient Network. Therapy is either provided at the cancer center or at a convenient Burke outpatient location close to home. Certified lymphedema therapists are available to support patients with swelling and edema that may occur after surgery, lymph node removal, and radiation.

Caregiver Support

Caring for a family member or loved one with cancer can be challenging physically and emotionally. Caregiver support and counseling, as well as a range of workshops and programming, are available at the Center for Cancer Care. In addition, caregivers have access to the Caregiver Support Room at the Hospital, and the Patient Resource Room in the cancer center, to take respite, talk to a volunteer, use a computer, or access valuable information and resources.

Palliative Medicine

Palliative Medicine is an extra layer of support for patients and families who are living and adjusting to life with cancer. Our team provides expert pain and symptom management and conversations about understanding your illness. We focus on improving quality of life and reducing suffering at any stage of illness, regardless of diagnosis, prognosis or age. This may include support and counseling to help cope with the changes that serious illness brings to daily life, assistance in communicating with other medical providers, and help in connecting with community resources. Services may also include assistance with planning for the future, including financial and advance directives.

Pastoral Care

Care of the spirit is an integral part of patient care. The Department of Pastoral Care, comprised of professionally trained and board-certified chaplains, is available to support patients and families encountering the challenges of illness, treatment options, or loss.

OUR COMMUNITY PARTNERS

Members of the White Plains Hospital Cancer Program care team regularly refer patients to the following resources, which you may find useful.

American Cancer Society (ACS)

cancer.org

1-800-227-2345 or 914-949-4800

Help with insurance issues, transportation issues, hair-loss and mastectomy products, online communities, and Reach to Recovery, a breast cancer referral process that pairs newly diagnosed patients with survivors.

Burke Rehabilitation Hospital

burke.org

914-597-2500

Dedicated rehabilitation service for adults to help them regain maximum mobility and independence.

Cancer Support Team

cancersupportteam.org

914-777-2777

Nursing case management, pain and symptom control, counseling, community referrals, advocacy and bereavement services. Limited financial and transportation assistance is available.

FOLLOW-UP CARE AND SURVIVORSHIP

There are now almost 17.5 million people in the United States who are cancer survivors. Survivorship involves every aspect of your wellbeing and health maintenance after your cancer diagnosis and once your treatment is completed.

Patients receive a great deal of support during their treatment, but once treatment ends, it is often difficult to make a transition to a new way of life. In 2006, the Institute of Medicine issued a report recommending that every cancer patient receive an individualized survivorship care plan that includes guidelines for monitoring and maintaining their health.

White Plains Hospital provides an individualized Survivorship Care Plan to help improve the quality of care of our survivors as they move beyond their cancer treatment. The Hospital celebrates Survivors' Day every year on the first Sunday in June.

Top: Cancer survivor with her son, with whom she was pregnant during her cancer diagnosis and treatment.

Bottom: Three years later.

Family Services of Westchester

fsw.org

914-937-2320

Support groups and counseling.

Gilda's Club Westchester

gildasclubwestchester.org

914-644-8844

Free of charge and non-profit, Gilda's Club Westchester offers networking and support groups, lectures and workshops, and social activities in a nonresidential, yet home-like setting.

Livestrong Program at Rye YMCA

ryeymca.org/programs/community-health/livestrong-at-the-ymca/

914-967-6363

A research-based physical activity and well-being program designed to help adult cancer survivors build muscle strength, increase flexibility and endurance, and improve functional ability.

Westchester County Department of Social Services

socialservices.westchestergov.com/

914-995-5000

Provides an array of services including child support, food, housing, medical services, and protective and preventive services for vulnerable children and adults.

BILLING, FINANCE, INSURANCE AND MISCELLANEOUS

BILLING QUESTIONS

For questions related to bills that you receive from your health care providers, please refer to the phone number listed directly on the bill. For hospital billing questions related to your hospital outpatient treatment or hospital inpatient stay, please call Patient Accounts at 914-681-1004.

FINANCIAL ASSISTANCE

White Plains Hospital is a voluntary not-for-profit organization with the mission of caring for patients 24 hours a day, seven days a week, 365 days a year, regardless of their ability to pay. If you do not have health insurance or worry that you may not be able to pay in full for your care, we can help. White Plains Hospital provides financial assistance to patients based on their income, family size and needs. In addition, we may be able to help you get free or low-cost health insurance, or work with you to arrange a manageable payment plan.

For questions related to financial assistance, call our Patient Accounts Department at 914-681-1004, or call the Patient Financial Advocate at 914-681-1259.

INSURANCE

White Plains Hospital accepts most types of insurance, including Medicaid and Medicare.

For questions about insurance, please contact Patient Accounts at 914-681-1004.

FOREIGN LANGUAGE INTERPRETATION

Interpretation services for more than 140 foreign languages are available upon request. Sign Language interpretation is also available. Your nurse can access these services for you or a family member.

CANCER CENTER VOLUNTEERS

Cancer Center volunteers are integral members of the interdisciplinary team providing hospitality and support to patients and family members. They offer companionship, information, resources, and advocacy that will enhance a sense of well-being and the community of care.

If you're interested in volunteering, please contact the White Plains Hospital volunteer office at 914-681-1225.

OUR FACILITIES

White Plains Hospital's Center for Cancer Care accommodates the growing number of cancer experts, complementary therapies and services offered in one location for our patients. Creating a healing environment was paramount in the design of this new facility, keeping patient comfort and convenience top of mind.

The 75,000 square foot facility houses nearly 40 infusion bays, radiation therapy, medical and surgical oncologist offices as well as additional clinical support services. Complementary therapy rooms, a state-of-the-art conference center and multi-purpose room, as well as café and boutique are all on the main reception floor.

Parking for the Center for Cancer Care

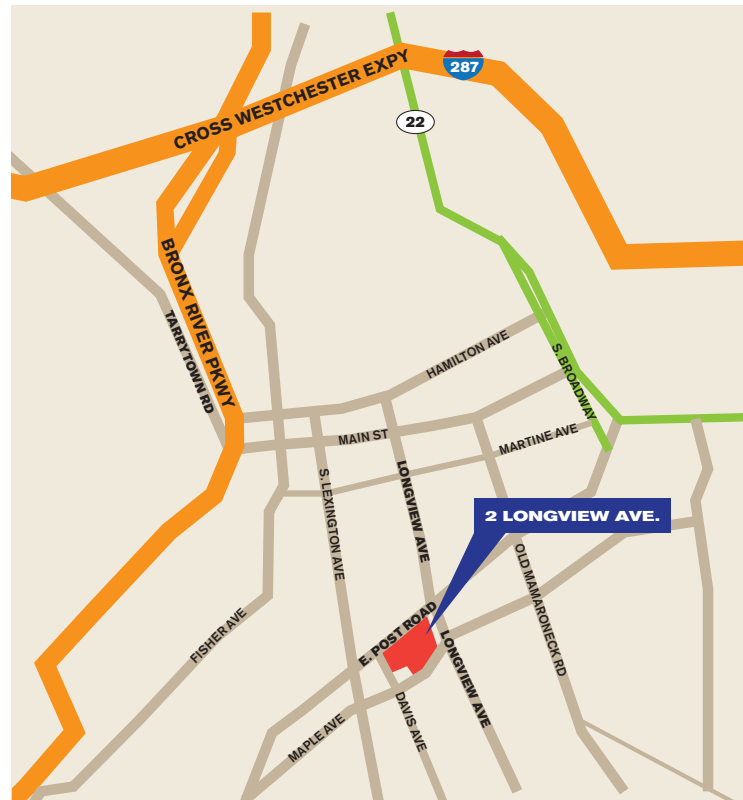

Valet parking is available for patients' convenience. Visitors may also park in the municipal garage across the street from the Center for Cancer Care on Longview Avenue, where metered parking is available.

LOCATION

The White Plains Hospital Center for Cancer Care is located at 2 Longview Avenue (on the corner of East Post Road) in White Plains.

We have additional locations both on and off campus providing some of our cancer services. Your healthcare team can direct you to these resources as needed.

The White Plains Hospital Center for Cancer Care is conveniently located in the heart of Westchester County, NY, near several major highways (including Route 287, the NY State Thruway, the New England Thruway, and the Hutchinson Parkway) and public transportation (Metro North -White Plains stop on the Harlem line).

PATIENT FEEDBACK

Consumer Advocate Patient Representative

The Consumer Advocate/Patient Representative is a direct link to the Hospital administration and serves as a liaison between the patient, the family and the Hospital. The Consumer Advocate's goal is to improve the hospital experience by explaining policy, answering questions, and seeking resolutions to issues. For more information, call 914-681-2150.

How to Recognize Staff

Every day, we hear from patients about their exceptional doctors, nurses, and technicians. Many tell us about environmental services staff, food servers, parking attendants and other employees who made a difference in their hospital experience by providing comfort, warmth, support and kindness to them and their loved ones. You can share your story or make a donation in someone's honor (we will inform each person you honor of your gift and staff members will also receive an angel pin to wear proudly as a symbol of your gratitude) by visiting www.givetowphospital.org or calling 914-681-1040. You can also send a letter to Susan Fox, President and CEO of White Plains Hospital, at: 41 East Post Road, White Plains, NY 10601.

AWARD WINNING CANCER PROGRAM

White Plains Hospital and its Center for Cancer Care have received many accolades that reflect our dedication and commitment to outstanding patient care. Below are some of the recent recognitions we have received:

- Outstanding Achievement Award for Cancer Care and Commission on Cancer (CoC) Accreditation
- CEO Cancer Gold Standard accreditation
- National Accreditation Program for Breast Centers (NAPBC)
- American College of Radiology (ACR) – Breast Imaging Center of Excellence
- Women’s Choice Award as one of America’s Best Breast Centers

In addition, the Hospital has received numerous accolades for exceptional quality including:

- Magnet Recognition Program®
- Healthgrades® Outstanding Patient Experience Award
- Joint Commission Gold Seal of Approval
- The Leapfrog Group Hospital Safety Score®
- Consumer Choice Award
- Nurses Improving Care for Health System
- Elders (NICHE) Designation
- American Association of Critical Care
- Nurses Beacon Award for Excellence
- Joint Commission Top Performer
- Women’s Choice Award for America’s Best Hospitals

White Plains Hospital is certified by the New York State Department of Health (DOH), approved by the New York State Department of Mental Hygiene, and accredited by the American College of Radiology and American Committee of the College of American Pathologists.
